

Pre-Interview task
for Coordinators (2025-26)

Tables of contents

Technical Domain-

- Training & Workshops
- Web Development
- XR Development

Non-Technical Domain-

- Community Engagement
- Publicity & Outreach
- Social Media
- Multimedia
- Content & Branding
- Management
- Finance & Sponsorship

TECHNICAL DOMAINS

1. Training & Workshop

Task 1: Design a Comprehensive 1-Hour Workshop Plan

Goal: Evaluate planning and clarity skills.

Task: Select a technical topic you're familiar with and create a concise plan for a one-hour workshop. Please include:

- Workshop title
- A 3-step agenda (Introduction, Demonstration, Q&A)
- Required tools/software
- A 3-line summary of key takeaways for attendees

Task 2: Explain a Technical Concept in 1 Minute

Goal: Assess communication and understanding skills.

Task: Prepare a 1-minute pitch explaining a technical concept (e.g., API, Git, AR).

Task 3: Propose an Engaging Workshop Idea

Goal: Evaluate innovation and audience-centric thinking.

Task: Imagine organizing a fun, hands-on workshop for beginners. Choose a topic and activity, and describe:

- The topic
- Why it's engaging and interactive
- What participants will do hands-on during the workshop (4-5 lines)

2. Web Development

1. Make one smooth working 3D interactive website small scale.
2. Can share your previous projects on fullstack.
3. Can also share core html, css, js.

3. XR Developement

Objective:

To evaluate whether the candidate who have applied have basic Unity knowledge and basic understanding of Coding practices

Prerequisites:

They should be familiar with:

- Unity Editor basics
- C# scripting
- Prefabs, components, and scene management
- XR Interaction Toolkit (basic)
- GIT AND GITHUB

Some Basic Questions

Unity Fundamentals

- a) Difference between **GameObject** and Prefab.
- b) Role of the **Inspector** and **Hierarchy** panels.
- c) What are **ScriptableObjects** and when should they be used?

C# in Unity

- a) Explain Update(), FixedUpdate(), and LateUpdate().
- b) Describe how Unity's event system works (e.g., OnTriggerEnter).
- c) How do you use coroutines for timed actions?

Scene & Asset Management

- a) What are Scenes, and how can you load another at runtime?
- b) Why is asset optimization important?
- c) Describe a good folder structure for a Unity project.

➤ Space Shuttle Game (Pre-interview Task)

Objective:

To evaluate the candidate's **Unity fundamentals, C# scripting, object pooling, and game logic** — all of which are key for XR development.

Even though it's not directly XR-based, this task checks their **core Unity + programming skills**, which are essential before moving to XR interactions.

Task Description:

Build a **2D top-down space shooter** game in Unity where the player controls a spaceship that fires bullets to destroy enemies that spawn automatically.

❧ Requirements:

1. Player Setup:

- The player controls a **spaceship** using arrow keys or WASD.
- Press **Spacebar** to shoot bullets.
- Player movement should be **smooth and clamped** within screen boundaries.

2. Enemy Setup:

- Enemies spawn automatically from the top at random X positions.
- They move downward at a fixed or random speed.
- When hit by a bullet → they get destroyed (with sound or effect).

3. Scoring System:

- Each enemy destroyed gives +1 point.
- Display the score on the screen (UI Text or TMP).

4. Game Over Condition:

- If an enemy touches the player → game over message appears.
- Optionally, allow restart using a button or key.

5. Bonus (Optional):

- Add background scrolling.
- Add explosion animation or particle effects.
- Add sound effects (shooting, explosion, background music).

- Add stages or levels

Submission Requirements:

- Unity version: **2021.3 LTS or later**
- Submit a **GitHub repo** containing:
 - Assets, Scripts, Scenes folders (no Library folder)
 - A short **README.md** describing:
 - Controls
 - Game logic overview
 - Unity version
- Optional: **.exe build** or **WebGL link** for demo

Evaluation Criteria:

Criteria	Description	Weight
Gameplay Functionality	Smooth movement, firing, and spawning	35%
Code Quality	Clean, commented, modular C# code	25%
Polish & Creativity	Sound, effects, UI	20%
Documentation & Build	Clear README and runnable build	20%

Time Limit

- Submission: **before interviews**
- Submit on this google form : <https://forms.gle/w8qgReGgLjEDWoNu>

NON-TECHNICAL DOMAINS

1. Community Engagement

1. Icebreaker Activity

- Design a short bonding/icebreaker activity for new members. Include:
- Event name & concept
- Duration and format
- How it helps members connect
- Fun element involved

2. Welcome Message

- Write a short welcome message for a new member to make them feel included and motivated.

3. Brainstorming Support

- Members are struggling to think of AR/VR ideas. How would you help them brainstorm and keep the session productive? Mention any tools/methods.

4. Server Improvement Ideas

- You are managing the club's Discord/WhatsApp. List 3 ideas to make it more engaging and interactive.

5. Community Campaign Idea

- Suggest a community-driven campaign (e.g., Member of the Month, VR Fun Fact Friday, etc.)

2. Publicity and Outreach

1. A clear idea what is AR VR and what is publicity domain
2. How would you attract students to attend an AR/VR event or workshop?
3. Describe one creative campaign you would plan to promote our next event.
4. How can you tackle this issue when someone says i am not that interested.
5. As this club is new in college do you think you can sell tickets when there is few days left for a event to start.

3. Social Media

1.Post Design :

Create an Instagram post or story for a recent or upcoming Festival.
You can check the references from the previous insta stories.

2. Reel/Short Video Idea Pitch:

Suggest 2–3 creative Instagram Reel ideas to promote a specific club event.

3.Story Poll or Quiz Creation:

Create an interactive story (poll, question, or quiz) related to your club/event.

4. Event Announcement Design:

Create a digital poster for an imaginary or upcoming club event
(e.g., “Meet the Mentors”)

5.Engagement Strategy Task

Write 5 ideas to increase engagement on the club’s Instagram handle.

4. Multimedia

GRAPHIC DESIGN

1. Poster Design: Design a poster for an upcoming event by SIG VIT Pune.
2. Grid Planning: Plan a 3×3 grid layout for the event — include teaser, informative carousels, 3 speaker posts, post-event reel, and aftermovie (design not required, just blueprint).
3. Creative Design: Design something gamified and cool.
4. Share your previous design works to showcase your style and skills.

VIDEO EDITING

1. Make a 10–15 sec cinematic video with clips and text animations.
2. Make a beat-synced edit using keyframes for smooth transitions (Instagram or gameplay edit).
3. Share your previous edit to showcase your editing style and skills.

VEDIOGRAPHY

1. Shot Ideation: Plan and suggest camera shots for an event in the college auditorium — wide shots, crowd reactions, speaker close-ups, stage panning, audience interactions, etc.
2. Showcase your previous work.

5. Content & Branding

1. Draft a Whatsapp message and email for an event on AI integration in AR/VR, (refer our last event messages). Suggest event names too.
2. Create 3-4 one-liners for Instagram captions for a Workshop based AR/VR Fundamentals

3. Portfolio of Previous Work: (Optional)

At least 2–3 samples: blog posts, articles, social media captions, newsletters, or any published writing.

Can be on **Medium, Blogger, Wordpress**, personal blog, newspaper/magazine, or even in a **Google Doc** (if unpublished).

6. Management

1. Event Readiness & Coordination

You are assigned to coordinate a hands-on AR/VR workshop. List the first five tasks you would do to ensure everything is organized before the event begins.

2. Time Management Under Pressure

If the event setup is running 30 minutes late, and tasks like seating layout, attendance setup, and speaker mic testing are still incomplete — how would you prioritize and delegate these tasks?

3. On-Ground Decision Making

During the event, the faculty coordinator asks for an updated schedule or status of event progress. However, the event head is busy on stage. How would you respond and manage this situation?

4. Communication & Documentation

Describe how you would ensure smooth communication between departments like Tech, Design, Publicity, and Management before and during an event.

Also, name two documents or records you would make sure to maintain after the event.

5. Crisis Situation Handling

The VR device setup is delayed and the audience is waiting with no activity happening on stage. What is one immediate temporary solution you would implement to keep the audience engaged while the setup is completed?

7. Finance & Sponsorship

Description:

Finance is responsible for managing the club's financial resources.

This includes budgeting, accounting, financial reporting.

Sponsorship focuses on securing financial and in-kind support from sponsors. This involves identifying potential sponsors, creating sponsorship proposals, negotiating agreements, and maintaining relationships with sponsors.

Pre Requisite Tasks:

- 1) Identify what are purchasing orders and quotations and the process to file them.
- 2) Give ideas for how the club can raise funds for upcoming events.
- 3) Identify potential sponsors for our club.
- 4) Suppose you have secured a meeting with a potential sponsor, make a pitch about our club and event and perform it during the interview.
